

Freezetherm®

Range of readily available and affordable pre-qualified dry ice shipping systems.

Our Freezetherm range of pre-qualified shipping systems provide protection for products that need to be frozen when shipped.

- A range of sizes available from 6 to 396 Litres (internal capacity)
- Tested to ambient temperatures of between +10°C and +35°C
- Supplied with pre printed cartons with all necessary dry ice markings
- Qualification reports available on request
- Advice on quantity of dry ice to use

Dry ice systems for cost effective deep frozen shipping

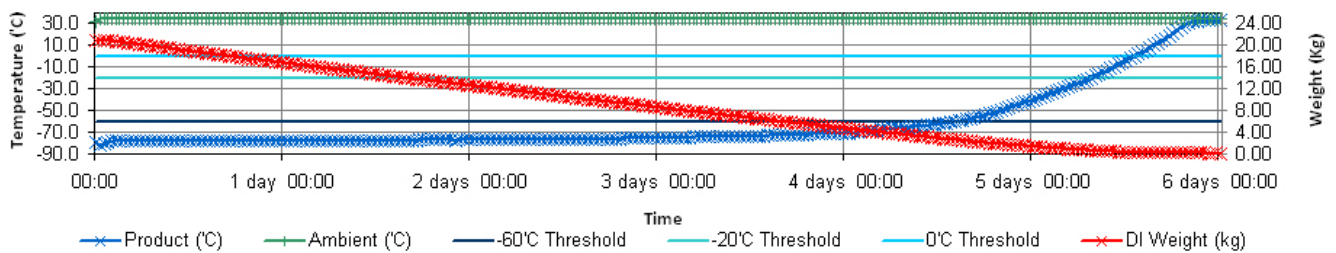

Our Freezetherm® range of dry ice shipping systems provides a readily available and affordable method of protecting frozen products in transit. The packaging systems are supplied pre-tested and qualified, so you can use them straight away with confidence.

The shippers have been proven to keep temperature sensitive products deep frozen in ambient temperatures of up to +35°C making them suitable for a wide range of applications and environments.

Guideline data is available with the systems, including product temperature vs. time, and tare weight of dry ice vs. time measurements.

The Freezetherm® shippers are available in various sizes, with internal volumes ranging from 6 to 396 litres, helping you keep shipping costs down.

For more information on the Freezetherm® range of shippers, please call us on +44 (0)1442 828664 or email enquiries@laminarmedica.co.uk
